

Product Facts

ZION SI 7020 Boiler Scale Inhibitor

Description.

ZION SI 7020 is an effective scale inhibitor used in Boiler chemical treatment. This product used as chemical softening agent in the boiler water treatment. ZION SI 7020 is an economical and convenient treatment for general Industrial application.

Features.

- Highly soluble.
- Economical.
- Stable.
- Convenient to handle.
- Effective.
- Fast acting.

Application and Dosage level.

ZION SI 7020 is miscible with water in all proportions. ZION SI 7020 is an aqueous solution of organic acids and is corrosive in its concentrated form. Corrosion resistant dosing equipment must therefore be used.

Examples of suitable materials are PVC, glass reinforced plastic or HDPE. Use sufficient ZION SI 7020 to maintain zero hardness and a positive product residual in the boiler water. Your Zion product Engineer will recommend you the best treatment program suited for your system. Any convenient feed equipment can be used. Continuous feed in proportion to the flow is preferred.

Specifications.

Physical form - liquid
pH - 8.5 - 10.5
Specific Gravity at 25°C - 1.0 - 1.10

Storage.

Keep container tightly closed in a cool place.

Packaging.

ZION SI 7020 is available in HDPE 25 kg, 50 kg containers.
