

Product Facts

ZION MP 7700 Multi-Purpose Boiler Water Treatment Chemical

Description.

ZION MP 7700 is a mixture of softening agent and a speciality synthetic polymer based product, ZION MP 7700 is a single formulation for controlling hardness and alkalinity, dispersing boiler water sludge and prevent foaming.

Features.

- Prevents scale and sludge.
- Chemically stable.
- Non-corrosive .
- Biodegradable.
- Liquid form, instantly soluble.
- Restores heat transfer.

Application and Dosage level.

The treatment dosage will vary with feed water quality and boiler water concentration limits. Generally dosage should be adjusted to provide the recommended residual level of the product in the boiler

water. Your ZION Product Engineer will recommend you the best treatment program suited for your system. Any convenient feed equipment can be used. Continuous feed in proportion to the flow is preferred.

Specifications.

Physical form - liquid
pH - 8.5 - 10.5
Specific gravity at 25°C - 1.10 - 1.20

Storage.

Keep container tightly closed in a cool place.

Packaging.

ZION MP 7700 is available in HDPE 25 kg, 50 kg containers.
